Repeated String

Lilah has a string, s, of lowercase English letters that she repeated infinitely many times.

Given an integer, n, find and print the number of letter a 's in the first n letters of Lilah's infinite string.

Input Format

The first line contains a single string, \boldsymbol{s} .

The second line contains an integer, n.

Constraints

- $1 \le |s| \le 100$
- $1 \le n \le 10^{12}$
- For 25% of the test cases, $n \leq 10^6$.

Output Format

Print a single integer denoting the number of letter a 's in the first n letters of the infinite string created by repeating s infinitely many times.

Sample Input 0

aba

Sample Output 0

7

Explanation 0

The first n=10 letters of the infinite string are abaabaabaa. Because there are 7 a's, we print 7 on a new line.

Sample Input 1

a 10000000000000

Sample Output 1

1000000000000

Explanation 1

Because all of the first n=1000000000000 letters of the infinite string are a, we print 1000000000000 on a new line.
